

IT-INHOUSE CONSULTANT FOR PROCUREMENT PROCESSES (M/F/X)

Blum produces lift, hinge and pull-out systems for furniture that are delivered to more than 120 markets. Did you know that we employ around 300 IT specialists to take care of our modern IT environment? Our in-house IT consultants provide the IT know-how to support staff at our head office in Vorarlberg and our 33 subsidiaries.

YOU WILL

- ... drive forward development, lead projects, ensure process flows and help to shape the procurement process – from sourcing to paying supplier invoices
- ... attach importance to reliable, lean processes, excellent usability and a decent performance overall
- ... be the first point of contact for any changes deemed necessary or desirable by the specialist departments within the international Blum Group. You will find the common ground behind the individual demands and translate this into readily attainable, technical and organisational solutions in the system
- ... ensure that the solutions are implemented and run reliably and efficiently, together with your colleagues in the development teams and in user support
- ... also occasionally take on project management responsibilities for major projects, such as implementing our procurement solution in a new plant overseas, dealing with the process from resource planning to deadline monitoring

WE

- ... are looking for someone who feels at home in a purchasing team, is a skilful communicator and welcomes tricky situations
- ... will inspire you with our procurement processes (if purchasing is your world) – you already have a few years of practical work experience or have successfully completed relevant internships
- ... will provide a field of activity where around 60% of your working hours are spent communicating and networking – it is up to you to bring the right people together, mediate different interests, present your own ideas, develop, discuss and weigh up different solutions and lay the groundwork for decisions
- ... work primarily with SAP ERP and Ariba. It is an advantage if you are already familiar with these tools. If not, training will be provided
- ... attach importance to working independently and having a good working relationship with internal and external partners
- ... live for innovation – you love variety and are not thrown off track by unforeseen events. This job involves few routine activities
