

DEVELOPMENT TECHNICIAN IN MECHATRONICS WITH FOCUS ON ELECTRONICS (F/M/X)

The family-owned company Blum manufactures flap systems, hinges, pull-out systems, and pocket systems that are installed in furniture all over the world. Did you know that in our "Mechatronics" department we develop mechatronic products and take responsibility for them from the idea through the entire product lifecycle? In addition to mechanics, hardware development, along with software and firmware development, is at the heart of mechatronic product development. We are the contacts for mechatronic products throughout their entire lifecycle.

YOU

- ... create the electronic hardware for functional samples and prototypes
- ... qualify new electrical and electronic components for ongoing series production
- ... optimize the electronic hardware of our series products
- ... coordinate product changes and maintain their product configurations

WE

- ... value good education – you have completed a technical education in the field of electronics or electrical engineering (HTL or higher) and ideally have already gained professional experience in your area
- ... are looking for a motivated team member with analytical skills and organizational talent
- ... work in interdisciplinary teams with many interfaces - confident demeanor and negotiating skills are required
- ... rely on independent work and self-responsible actions
